Secondary Immunodeficiency (SID) in Patients with B-Cell Hematological Malignancies

«Managing the Risk of Infections with Novel Hematological Malignancy Treatments: A Silent Threat»

Organisation:	healthbook.ch
Date:	Thursday November 28 th
Duration:	18:00-19:50, 110 min
Target groups:	Hemato-oncologists; infectious disease specialists, immunologists.
Language:	English
Sponsors:	Kite/Gilead and Takeda

Objectives of this Webinar:

- Increase awareness of the impact of SID on the management of hematological malignancies
- Improve understanding of the added complexity of managing secondary infections in a dynamic treatment landscape, particularly with CAR-T and bispecific antibodies
- Discuss effective management strategies for SID alongside the treatment of hematological malignancies
- Explore the challenges associated with treating complex or recurrent infections due to SID and novel therapies

Agenda

18:00 – 18:05	Welcome and Introduction Co-Chairs: Prof. Frank Stenner (USB Basel) and Prof. Mike Recher (USB Basel) 5'
18:05 – 18:30	Hypogammaglobulinemia: Primary, secondary or both? Prof. Mike Recher (USB Basel) <i>Presentation & Discussion 20'+5'</i>
18:30 – 18:55	CAR-T: Navigating the unintended consequences in B-Cell Hematological Malignancies Prof. Urban Novak (Inselspital Bern) <i>Presentation & Discussion 20'+5'</i>
18:55 – 19:20	The impact of B-cell function impairing drugs in Hemato-Oncology Prof. Frank Stenner (USB Basel) <i>Presentation & Discussion 20'+5'</i>
19:20 – 19:45	Handling complex infections amidst novel therapeutics like CAR-T and bispecifics including guidance on IgRT (immunoglobulin replacement therapy) Prof. Dominik Schneidawind, (USZ) <i>Presentation & Discussion 20'+5'</i>
19:45 – 19:50	Concluding remarks Co-Chairs: Prof. Frank Stenner (USB Basel) and Prof. Mike Recher (USB Basel) 5'
