2nd Swiss Annual Meeting on HER2 positive Breast Cancer

Thursday, April 20, 2023, 17.00 – 19.00 p.m.

University Hospital Basel, Frauenklinik
Hörsaal 2, 2. Stock/Klinikum 1

Local Symposium & Webinar

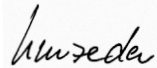

Dear colleagues

The emergence of antibody based therapies has changed our view on Her-2 overexpressing breast cancer, a story of great success in ongoing.

Most recently HER2 directed ADCs have shown activity in HER2 negative but HER2 low breast cancer patients and the books on classification of breast cancer need to be rewritten. With all these improvements also new questions, challenges and controversies arise. Again we want to present and summarize recent advances and offer a practice focused education symposium. Eventually we want to explore and discuss with you current treatment practice and future perspectives for the treatment of HER2 overexpressing breast cancer.

We look forward to your participation.

Best regards

Prof. Christian Kurzeder
Head of the Basel Breast Center,
University Hospital Basel, Frauenklinik

PD Dr. Marcus Vetter
Head Physician of Oncology,
Hematology & Immunotherapy
Medical University Clinic,
Kantonsspital Baselland

Many thanks to our partner and our sponsors
